Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate, teach or suggest a method of forming multiple gate insulator layers on a semiconductor substrate having a core region and an I/O region substantially as claimed, wherein the method comprises: removing the first insulator from the I/O region of the substrate, resulting in a first gate insulator having a first thickness located on the core region of the substrate; and selectively forming a second gate insulator having a second thickness on the I/O region of the substrate, as recited in claim 1. Moreover, the prior art of record does not anticipate, teach or suggest a method of forming multiple thickness gate insulator layers on a silicon-containing substrate substantially as claimed, wherein the method comprises: selectively removing, using a photoresist shape, a first dielectric layer from a second portion of the substrate resulting in a first gate insulator layer, having a first thickness, located on a first portion of the substrate; then removing the photoresist shape; and, then performing a second hydrofluoric (HF) pre-clean procedure, as recited in claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
